Weekly Coal Production

Production for Week Ended:
April 30, 1988

Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as

specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1986*, and *Coal Data: A Reference*.

This publication was prepared by Judith Wood under the direction of Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202/586-8800).*

Summary

U.S. coal production in the week ended April 30, 1988, as estimated by the Energy Information Administration, totaled 18.2 million short tons (bituminous coal and lignite, 18.1 million short tons; Pennsylvania anthracite, .08 million short tons). This was 2.3 percent higher than production in the previous week, and was 8.6 percent higher than production in the corresponding week of 1987.

For the first two months of 1988, coal consumption at electric utilities was 11.1 percent higher than the same period of 1987. Stocks at the end of February 1988 were 0.9 million short tons higher than a year earlier. Prices of coal delivered to electric utilities turned slightly higher in January 1988. The national average price was 146.6 cents per million Btu, 0.5 percent higher than the December 1987 average of 145.9 cents per million Btu.

User Instructions

Selected energy data reports can be obtained electronically from the Energy Information Administration (EIA) Computer Facility. Public access to these machine readable statistics is possible by dialing (202) 586-8658 for 300 baud or 1200 baud line speeds. Communications are asynchronous and require a standard ASCII-type terminal. There is no charge for the service. Although there is no required password, you will be requested to use your telephone number as a user identifier. This service is available from 8 a.m. to 11 p.m. weekdays and 10 a.m. to 6 p.m. on weekends and most holidays. The Weekly Coal Production report is normally updated by 2 p.m. on Friday of each week. Allow one or two additional workdays in weeks containing holidays. Questions or comments may be directed to Hans Becker at (202)586-6874.
